Objective

Software and Web Programmer

A position using proven technical skills and to further enhance my knowledge in the many, ever changing, computer hardware and software fields.

Expertise

- ◆ Expert back and front end engineer using OO-PHP & MySQL, Komodo IDE, Flash Builder, FLEX Builder, XHTML Strict & Traditional, AJAX (jQuery), XML, CSS, SVN & CMS.
- ◆ Expert in the Facebook REST API as well as MySpace OpenSocial platform.
- ◆ Extensive experience with Adobe Photoshop
- ◆ Intimate knowledge of PC setup and installation, as well as various peripherals, data entry, and file updating.
- ◆ Familiar with:
 - ◆ Microsoft Visual C#
 - ◆ Flash
 - ◆ Symantec ACT!
- ◆ Expert with Microsoft Office Suite including Microsoft Visio
- ◆ Expert with OpenOffice
- ◆ Extensive experience in telephone help-desk computer tech-support, including basic to advanced networking as well as software installations and Windows-based software needs.
- ◆ Experience in Windows-based network construction and maintenance using managed and unmanaged switching.

Employment History

Telltale Games Inc

San Rafael, CA

3/2010-Present

I am currently the Web Architect at Telltale Games Inc. I am involved with new and old projects throughout the entire project's life cycle from concept to implementation.

Constantly striving to innovate, I was the lead engineer in implementing new technologies such as Flash/JavaScript bridging as well as cross (hardware) platform applications.

Employment History (cont.)

KlickNation

San Francisco, CA

11/2009-2/2010

My time at KlickNation was as a contractor utilizing my knowledge of the Facebook API as well as my skills with PHP, XHTML and MySQL. I helped create and author many features used among KilckNations suite of Facebook applications.

Zynga Inc.

San Francisco, CA

9/2008-6/2009

Senior Web Developer

Creating new content as well as maintaining legacy PHP code for developing web based games for the Facebook and MySpace platforms.

Games directly worked on include Vampire Wars, Dragon Wars, Gang Wars, Prison Lockdown & Fashion Wars.

Questus

San Francisco, CA

2008

Software and Web Developer/Programmer & Photoshop Editor

Developed Javascript interaction between image and server data using an ASP engine.

Versicom Communications

Miamisburg, OH

10/2001-6/2008

Software and Web Developer/Programmer

Leader in three major commercial projects using PHP 5 and MySQL 5 that allow the client's customers to access back-end parsed stored data via a website created for the end user. The current status of the projects is they are being migrated from legacy procedural code to fully object-oriented design and function.
